

# Reach™ Mobile SIP Client

Allworx Reach™ combines effortless communications with complete mobility. Whether your smartphone or tablet is Apple or Android, Reach brings the rich functionality of your Allworx phone to your smartphone. Both Wi-Fi and cellular data networks are utilized for Allworx Reach access, so anywhere there is a signal — from across the room or across the globe — you are connected.

## Allworx Reach iPad App

Take a closer look at some of the coolest features of the **Allworx Reach iPad App**:

- 1 Reach™ maximizes its smart user interface to make day-to-day calling effortless, providing information and options to simplify your life. Manage your calls and activities from a single, easy to use intelligent interface.
- 2 You can simultaneously make and receive multiple calls, transfer and conference them together from the large, visual call windows.
- 3 Almost every Allworx function is at your fingertips, including seamlessly transferring any call, parking, or holding calls. You also have separate audio controls.
- 4 Call History makes it easy to view and return any incoming or outgoing call as well as missed calls.

- 5 Reach allows you to place calls from the internal Allworx system contacts list or your local contacts contained in your phone or tablet. As you dial a number, Reach searches all your contact lists for any matches, improving your calling productivity. You can also see every Allworx system user's presence along with the status of their Allworx phone and Reach device.
- 6 Manage your voicemails with ease. Listen to any message in any order you choose, and forward or create new messages with effortless prompts.

## Allworx takes you to new places with Reach™

Reach is an Allworx-created solution designed exclusively to work on Allworx systems, so setup is easy. It integrates seamlessly and works flawlessly.

Reach is a new licensed option within every Allworx server installed with System Software 7.5. Best of all, no additional hardware is needed for your system! Reach licenses are offered in cost-effective groups for small or large implementations.
